DETAILED ACTION

Allowable Subject Matter

1. Claims 19-24, 26-27, 29-35 are allowed.
2. After reviewing the remarks and the amendment made by the Applicant in response to the non-final office action the Examiner finds the remarks to be persuasive. The most pertinent prior art Ertl et al (US 2002/0149184) and Kohler et al US (7,245,741). Ertl discloses “the determination of the occupancy state is regarded as conclusive only if substantially identical evaluation result is obtained over a plurality of sequential time points.” Kohler discloses” a deviation between the 3D image and the 3D pattern exceeds a predetermined minimum value for the evaluation, a determination of the occupancy state is made indicating that the seat is occupied”, (column 2, lines 26-58-column 4, line 52-64). Neither Ertl nor Kohler discloses ” if a deviation between the 3D image and the 3D pattern exceeds a predetermined minimum value for the evaluation, a determination of the occupancy state is made indicating that the seat is occupied, and wherein the evaluation circuit includes a filter circuit for temporal filtering of a plurality of evaluation results sequentially obtained over time, and wherein the determination of the occupancy state is regarded as conclusive only if substantially identical evaluation result is obtained over a plurality of sequential time points” as cited in the independent claims. The Examiner finds no reason or motivation to combine the above references in an obviousness rejection thus placing the application in condition for allowance.

Any comments considered necessary by applicant must be submitted on later than the payment of the issue fee and to avoid processing delays should preferably accompany the issue

Art Unit: 2624

fee. Such submissions should be clearly labeled, comments on statement of reasons for allowance.
